Hi! All!

How can I Install Visual Studio 6.0 in Windows XP Embedded?

I use Windows XP Embedded with SP1, and add the "Dos Windows On Windows Support" component for it.

Thanks!

The error as follows:

```
-----Configuration: ssss - Win32 Debug-----  
Cannot start tool.  
System can not find the specify file  
System can not find the specify file  
Error spawning 'vcspawn.exe'. The build could not be performed.  
  
ssss.exe - 1 error(s), 0 warning(s)
```
