I appreciate this is a long shot and I think the answer is no, but&
Is there a utility that will allow you to change the bios settings from XPe,
I have around 600 terminals that will all be delivered to site with some bios
settings wrong. The only boot devices I have are LAN and hard disk. Basically
what I need is a utility that will allow me to change the settings as part of
the remote boot sequence.

Anybody?

Thanks for any help.

Rob
