ms,

Do you have LBA option turned on in BIOS?  
Also, BIOS upgrade may help.

With some versions of fdisk you will be prompted about the size > 512Mb:  
<http://support.microsoft.com/kb/q255867>

The following thread may also be helpful to you:

Hi,

Has anyone come across issues to do with fdisk not reporting correctly the size of a Compact Flash when it is say 4G in size. Fdisk reports CF as being just 512M. How would one resolve this issue. CF is SanDisk Extreme III 4Gb card , type Removable.

Regards

.
