If you're running that far behind in updates, I suggest you visit this web site and take a look at the information regarding parasites and Trojans: <http://www.aumha.org/a/parasite.htm> They've also got a very active Windows XP forum there, including information on Windows XP SP2. Your system sounds like it has multiple issues, and they need to be straightened out. BTW – you can order the XP SP2 CD (free, including delivery) from Microsoft: <http://www.microsoft.com/office/ork/xp/journ/Oxpsp2cd.html>
