Hi Jack,

You'll need to call the support of the company that configured your TV <> Internet Set Top Box with wireless access points.

Call the tech support for that unit, and ask them to either setup a "DMZ" (De-Militarized Zone which means the firewall is disabled) to bypass the built-in firewall, or open the necessary ports in the equipment with you.

Here's the List of all Ports used by Zone and DX Games: <http://mvps.org/nibblesnbits/PortRoute.html#ports>
(See your router's manual or that website for self help instructions)
