I have contacted my virus software and my computer people. I have firewalls, updated Virus definition and ALL the Microsoft updates.

My computer is fine until i have installed 2 programs:
Cisco VPN Client &
Creative Web Cam

When those get installed, it triggers an RPC service problem and it's like i have the ms blaster worm. I do a system restore, and everything is then fine.

I then disable system restore, run antivirus and nothing is found—nada!

can someone help??

Eddy
