Thanks for the suggestion.

In Device Manager, there are 6 items listed under "Sounds, video and game controllers". The only one that gives an uninstall option is SoundMax Integrated Digital Audio. I have uninstalled it and rebooted, installed an updated driver from Dell from Analog Devices (the source of my original driver). The sound works, but I am still unable to access a volume control from Control Panel, or to restore an icon to the taskbar. Where have I missed the boat?

>1) Right-click "My Computer" icon > Properties > Hardware
>> Device Manager.

>2) Click on the + sign against Sound, video, and game

>3) Remove each one of the devices (one by one) by
>highlighting each one, right-clicking and selecting
>Uninstall option if it is highlighted. You will have to
go

>back to sound, video, and game controllers each time.

>4) Once this is done, there will no longer be a sound,
