I cant seem to erase the data on my CD-RW. I go into my computer, select the CD ROM drive and usually on the left of the screen is "erase data on CD-RW" under system tasks. I dont seem to have this option at the moment. Ive looked in the help menu but cant find anything. Ive done it before but dont understand why i cant see the option to erase everything on the CDRW. Can you please point me in the correct direction. The options i have are Eject disk, change settings, add/remove programs, system info
