Hi Michael,

Thanks for your come back. I've tried Safe Mode, but apparently the SYSTEM can't get to any of the files it needs, as it just reboots itself. I'm thinking I'm going to have to use an emergency boot CD. Do you think I could then somehow change the permissions, so that I could subsequently do a Normal Boot? Only problem is I don't have an emergency XP Pro Boot CD. Do you know if I can download that from Microsoft somewhere. I have access another XP machine.

Thanks,
Don
