Hi,

My old machine crashed. I have a registered copy of XP Home and XP Pro.

I formatted the HD on the machine I want to load XP. It loads fine and I download SP1. After downloading SP1 the computer goes into constant reboot and it runs check disk continually.

I have tired "How to recover from a Corrupted Registry tht prevents XP from Starting" article 307545. No luck.

Can anyone help me out?

Thanks
Charlie
