DLA is one of the packages that allows you to do true 'Drag and Drop' burning of CDs, using 'packet writing'. See more at <http://aumha.org/win5/a/xpcd.htm>.

If you do not want it (and it is one of the best of such packages) uninstall it *\*properly\** through its entry in Add/Remove programs – don't go trying to delete bits of it piecemeal or you will be generating trouble
