| I've been to several friends recently and found they have mhotkey.exe
| installed. They don't know how it got there! Do you?
| Did a patch put it on? Or what?

| I found the following reference:

| "CHotKey mhotkey.exe or MK9805.EXE User's choice Enables special keys on
| Chicony keyboards. Special combinations include Internet, E-mail, vol+,
| vol-, mute, etc. Only required for extended features "
