Dell 4100 System

Ram 256

Windows Me

Aol with a dial up connection

What do I do first?

I purchased Zone Alarm and want to up grade to XP. I am ready to set up my DSL connection but I don't know what to do first. Install Zone Alarm, then XP, then DSL, Or Zone Alarm, DSL, and then upgrade to XP? I thought I needed a DSL connection to check to see if my system had any conflicts with XP but I also have heard many bad things about how Me has a lot of bugs? What do you suggest?

Nancy
