Not sure if I am following you here, as this makes no sense at all. And have no idea what could have possibly changed an Admin account to a Guest account but.....

The System Administrator becomes hidden once another admin account is created. To gain access to the system admin account, you either add it to the Welcome Screen by:

TweakUI/Logon/Show Administrator on the Welcome Screen  
<http://www.microsoft.com/windowsxp/pro/downloads/powertoys.asp>

Or...

Enable/Disable Administrator on Welcome Screen (Line 5)  
[http://www.kellys-korner-xp.com/xp\\_tweaks.htm](http://www.kellys-korner-xp.com/xp_tweaks.htm)

Or...

Press Control/Alt/Delete Twice for Pro and Boot into safe mode and login for Home.

Other than the above, what else have you done/installed recently?
