"It won't work" is not a complete statement of your problem. Does it give error messages or "hangs" on you???? What? Be more specific and elaborate so that someone may be of some assistance and help you solve your situation.

*> I have recently installed some software (Magix Audio Cleaning Lab Deluxe 3.0) and it wont work, I presume that it is something to do with my XP, but would be grateful to hear from anyone else this has happened to or anyone who may knows how to fix it. I have contacted the retailers and am currently awaitng their response.*
