Hi Terry,

Previously posted information, in OE grou[s]:

<quote>

Go to: Start>Run>Type in: regsvr32 inetcomm.dll – Press: OK. {Note the space after 32}.

If the problem re-occurs, do the fix again and download and run CWS shredder.

<http://www.spywareinfo.com/~merijn/downloads.html>.

Always check for CWS shredder updates before running

I receive my mail, to, from, subject lines and time arrived all ok ... however, no message is in the preview pane - can't access the actual message at all! Also the messages on my folders can't be accessed either!

Can anybody help me!?

I have outlook express 6, windows xp professional.

Hurry, I'm pulling out my hair!
