When this happens, leave it be for awhile then hit enter.

1. Insert the Windows XP CD
2. Click Start/Run and type:
"rundll32.exe advpack.dll,LaunchINFSection C:\Windows\Inf\sr.inf"

System Restore core files should be reinstalled.

Alternately, you may also open Windows Explorer, navigate to "C:\Windows\Inf" folder and right-click sr.inf (choose Install)
