Thanks for the thorough feedback, Rob. I know you said you tried everything.....so in question, can you confirm:

1. Did you disable all third party running programs as in Norton, ZA, etc?
2. The login issue has been solved by changing the C:\WINNT\system32\userinit.exe, entry.

I may be mis-reading this, could you please give more detail here in your meaning?

*>If I try to Restore to an earlier point, I go back to the Login Privileges  
> issue where this all started an need to start in Save Mode, access the  
> User  
> Profile and change the password to re-write the info (I guess)...*

3. Have you tried to reinstall IE? If not:  
Enable Reinstallation of Internet Explorer or OE (Line 114)  
[http://www.kellys-korner-xp.com/xp\\_tweaks.htm](http://www.kellys-korner-xp.com/xp_tweaks.htm)

Then re-install IE – Go to Start/Run, and type :  
"rundll32.exe setupapi,InstallHinfSection DefaultInstall 132  
%windir%\inf\ie.inf"

How to Reinstall or Repair Internet Explorer and Outlook Express in Windows XP
