Hi,

1. strange thing is that I don't have Workstation service nor I can't start it using Net Start Workstation. I checked Workstation in blackviper.com, it says that Background Intelligent Transfer Service requires it to function properly, but I can't find WORKstation service in my BITS' Dependencies' list, very strange.

2. The Server services doesn't work, I still get the Perfnet 2004 error, besides, is there any otherway to disable PerfNet ? coz I don't want to share my printer and files ?
