Nothing is wrong with it all you need is someone to point you in a direction. View/Sort By/Sort Decending ordered posts by most recent first. Find/"Sort" in the Subject line brought back my original post and "Sort" in the Message line brought back seven or eight posts including mine with sort, sorting or sorted in the message body.

Shows you old dogs can learn new tricks and very old dogs just sleep all day.

Last question and I'am history. To send this post I went back to the original microsoft.com to reply since I didn't know weather to "Reply To Sender" or"Reply To Group, in OE.

Thanks
