laptop
& desktop to share the same monitor (only one will be in use at a time).
The laptop is running Win XP Home and the desktop Win ME. I doubt you can
do it software wise but I was hoping there is some kind of physical
splitter
you could get for the cord such as with a phone line or most other
devices.*

You can buy switch boxes. They allow one monitor (and some also.. one
keyboard and one mouse) to drive two computers at the turn of a switch.
