Hi,

Did this happen after installed Adaware 6, if so, read the third post here:

<http://www.freedomlist.com/forum/viewtopic.php?t=16820>

If not, run this combo now, all of them:

Run Ad-Aware SE, Spybot and HijackThis:

<http://www.majorgeeks.com/downloads31.html>

Note: Update each program, once installed, before running.

Note2: To avoid the False-Flag for the DSO Exploit (W3), open Spybot/Advanced Mode/Settings/Ignore Products. On the All Products Tab, scrol to DSO Exploit and check that item only. Randy (silj)

If the above doesn't help, more info here:

[http://groups.google.com/groups?hl=en&lr=lang\\_en&newwindow=1&c2coff=1&q=Windows+Error%21&meta=group](http://groups.google.com/groups?hl=en&lr=lang_en&newwindow=1&c2coff=1&q=Windows+Error%21&meta=group)

Good luck!
