Hi Snip,

I would suggest doing a virus scan with up to date virus software.

If you are in need of virus software. Here are a couple to choose from, for free.

Download the software, and update it then do a complete virus scan.

AVG Anti-Virus – Free Download Page:

http://www.grisoft.com/us/us_dwnl_free.php

Free Offer: eTrust EZ Armor Security Suite from Computer Associates

<http://www.my-etrust.com/microsoft/index.cfm>

If a virus is found copy the name down.
