Remove the Upperfilters and Lowerfilters values completely from the following registry key:

HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\Class\{4D36E980-E325-11CE-BFC1-08002BE10318}

The Floppy Disk Drive Is Missing in My Computer Folder

Floppy Disk Formats That Are Supported in Windows XP

<http://support.microsoft.com/default.aspx?scid=kb:en-us:Q309623>

Added info:

Code 10

This device is either not present, not working properly, or does not have all the drivers installed. (Code 10). Try upgrading the device drivers for this device.

To resolve this error code, make sure the device is connected to the computer correctly. For example, make sure all cables are plugged in fully and that all adapter cards are properly seated.

Follow the suggested solution button and update the device driver. It may be possible to remove the device and redetect it using the Add New Hardware wizard.
