Ok, this is exactly what it says in my error log:

Source: MsiInstaller

Product: ISScript -Error 1406 Could not write value Folder to key  
\SOFTWARE\InstallShield\Driver\8\Intel32 system error. Verify that you have  
sufficient access to that key, or contact your support personnel.

It has to be something with the script because this software that I recently  
got with my digital camera I tried to install gave me this while trying to  
configure Windows Installer > 1607: Unable to install InstallShield Scripting  
Runtime.

Can anybody help? Thanks!
