To those of you who tried to help and to those of you who may have experienced my issue.

New hard drive installed, no problem except it would not show up on My Computer.

Wild as it may seem and after all the ideas I recieved, I found that because I have TweakUI for XP on the computer I went to the Drive category, and low and behold I checked my drive letter, hit Apply and said ok.

I opened My Computer and my new hard drive appeared.

Save this tip if you ever encounter this problem.

Regards to the MVP's.
