I am going to be travelling with a laptop for a few months so I want to have an assortment of setup disks on hand. This Vaio for instance comes with 3 system restore disks and 3 program disks, and that's without any of the apps that I'll have with me. Would it be possible to copy all these disks on to a few DVD's? If I had to resort to restoring would disk 1, Disk 2 etc be found on the DVD?

Thanks,

David
