| Hi, Experts!
| I have Trojan DyFuCA and no antitrojan remove it. I try 8-10 antitrojan
| programs, without success.
| If I manually delete and clean register, after restart its there again.
| Is any program to remove this before I go to drastic works (format all
| discs).
| Thanks!
| advo@xxxxxxxx
|

There are anti virus News Groups specifically for this type of discussion.

microsoft.public.scripting.virus.discussion
microsoft.public.security.virus
alt.comp.virus
alt.comp.anti-virus

Dump the contents of the IE Temporary Internet Folder cache (TIF)

start --> settings --> control panel --> internet options --> delete files

1) Download the following three items...

Trend Sysclean Package
<http://www.trendmicro.com/download/dcs.asp>

Latest Trend Pattern File.
<http://www.trendmicro.com/download/pattern.asp>

Ad-aware SE (free personal version v1.05)
<http://www.lavasoftusa.com/>

Trend Sysclean Method 1

Create a directory.
On drive "C:"

Re: Trojan DyFuCA problems

(e.g., "c:\sysclean")

Download SYSCLEAN.COM and place it in that directory.

Download the signature files (pattern files) by obtaining the ZIP file.

For example; lpt526.zip

Extract the contents of the ZIP file and place the contents in the same directory as SYSCLEAN.COM.

Trend Sysclean Method 2

The utility SYSCLEAN_FE in "Procedure 1" at the following URL
<http://www.ik-cs.com/got-a-virus.htm> automates the download and execution process of the Trend Sysclean Package.

- 2) Update Ad-aware with the latest definitions.
- 3) Disable System Restore
<http://vil.nai.com/vil/SystemHelpDocs/DisableSysRestore.htm>
- 4) Reboot your PC into Safe Mode and shutdown as many applications as possible
- 5) Using both the Trend Sysclean utility and Ad-aware, perform a Full Scan of your platform and clean/delete any infectors/parasites found.
(a few cycles may be needed)
- 6) Restart your PC and perform a "final" Full Scan of your platform using both the Trend Sysclean utility and Adaware
- 7) Re-enable System Restore and re-apply any System Restore preferences,
(e.g. HD space to use suggested 400 ~ 600MB),
- 8) Reboot your PC.
- 9) Create a new Restore point

* * Please report back your results ! * *
