The one you maybe referring to is Rnav2003.exe at

<http://service1.symantec.com/SUPPORT/sunset-c2002kb.nsf/f7d6cb402f0b760785256ee600549628/73bf2b6c4e168d>

Unfortunately this only uninstalls Norton AntiVirus 5.0/2000/2001/2002 or 2003.

If you know of a similar removal utility for newer versions (including the trial version), please post back.
