Hi,

> My question is what do I need if I get a pcie card? Do I need a compatible
> motherboard?

PCIe is a relatively new standard in video cards, and you will need a motherboard that supports it and has the proper slot for it. A PCIe card will not fit in a regular PCI slot. If you post back with the make/model of your motherboard or system, we should be able to tell you what type of card your system will support.
