I would personally recommend against this.

That's his opinion. You can't hurt anything by doing it.

I doubt that it will help, but give it a try anyway.

Yes, that's true. It's just that unless he is trying to save space, it generally decreases performance. It's safe, but I can't personally recommend it. I felt obligated to mention it as a caveat emptor, in case he did not get quite what he was looking for, which is what this tip oftentimes ends up in.
