

Re: Giantantispywareupdater

comes to anything about your precious Microsoft.

Example please. And how many thousands of dollars? Or are you just talking sh*t?

OK, do you acknowledge and accept that MS is a proven monopoly and an intellectual property infringer?

If so, do you acknowledge and accept that MS's monopolist actions have had an effect on its customers?

And do you acknowledge and accept that with PA and WGA, MS's is make "fair use" into piracy, which has no factual basis in law? No private non-commercial individual has ever been charge with piracy for installing software on more than one of their own computers, and certainly never been legally been found to have done anything legally wrong in doing that!

Many times? ROFL! Notice you don't give examples!

LOL!

No. For now on I'm gonna call a spade, a spade. Only a Troll changes the words of others, instead of snipping them. YOU ARE A TROLL. And you prove that with YOUR actions, Juppy.

Now you can have the last word, as your ego needs it so much, Troll!

A Troll is what a Troll Does!

"xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx"

Oh I know, that is your MicroTroll way of letting me know about all the kisses you'd want to give me in person! ;-)

"Trustworthy Computing" is only another example of an Oxymoron!

"Produkt-Aktivierung macht frei"
