I've Panda IS 2004 installed and on OE toolbar there are 3 "boxes" showing with rest of items.

The first is black, second is grey and third is black box. Passing mouse over each in turn show icon and name. No mouse, no icon or name. These are; 'This is Spam', 'This is not Spam' and 'Configure Anti Spam'.

If "no text labels" selected, boxes just shown. if "selective text on right" selected, all other icons have text shown but these boxes have none. If "show text labels" selected, all text labels appear under each icon, including the "boxes". Still no icons.

Customising toolbar doesn't show these boxes as an option to hide or remove.

Remesh (MS-MVP), pointed me to a toolbar program to correct an issue I had with the IE toolbar. One for Outlook Express would be extremely useful.

Can anyone help me on this issue

.
