If you are talking about MS Word, which is included in the MS Office Suite, and later versions of the MS Works Suite, neither suite is part of the Windows XP operating system. If you reinstalled Windows XP, you will have to reinstall either MS Office or the MS Works Suite from their CDs. If you are just looking to use a word processor, and not necessarily MS Word, you can click Start button/All Programs/Accessories/WordPad (WordPad does not have as many features as MS Word).
