In reviewing my saved messages, I ran across a recommendation of File Unlocker; however, the download was from a Web site I don't trust and the recommender was one I don't have a lot of confidence in.

I did some googling and the program itself appears to be legitimate: <http://ccollomb.free.fr/unlocker/> though there's no contact information for the program author.

Has anybody used this program, who can share your experience positive or negative? Thanks!
