I can't get rid of this thing. I'm trying to remove it through eTrust personal firewall and it keeps saying " cannot delete an active network", I can put it in either the trusted zone or the internet zone, which should it be in or how can I get rid of it?

Does anyone know what this website is? It installed itself on my computer one day.

Name New Network
Zone Trusted
Entry Type Network
IP Address / Site 12.214.48.0/255.255.254.0

It is unwanted spyaware/adware, also known as New.Net

You will not be able to remove this malware with an antivirus program or a firewall. Go through the malware removal steps here:
http://www.elephantboycomputers.com/page2.html#Removing_Malware

Re: New Network II

Be systematic, doing all work with updated tools in Safe Mode.

Malke
