Shane,

Are you virus free?

Ctrl + Alt + Delete isn't gonna work until you get rid of the viruses.

Update your antivirus software and run a full system scan.

Do the same for whatever anti-spyware applications that you have.

Read this whole thing again...

Task Manager, MSCONFIG, or REGEDIT disappear while opening
<http://www.mvps.org/sramesh2k/ToolsQuit.htm>

--

Hope this helps. Let us know.

Thank you very much.

I have used this one
Task Manager, MSCONFIG, or REGEDIT disappear while opening

<http://www.mvps.org/sramesh2k/ToolsQuit.htm>

And have made the copies which seem to work when I click on them. I use
need to get the task manager to open when I use Ctrl Alt Delete. Not
sure how to do that yet.

Thanks

If no tabs are visible, double click anywhere on the Task Manager border.

Task Manager Menu Bar and Tabs Are Not Visible
<http://support.microsoft.com/default.aspx?scid=kb:en-us:193050>

When you open Task Manager, flashes for a second and quits.
This symptom is caused by Viruses.

Task Manager, MSCONFIG, or REGEDIT disappear while opening
<http://www.mvps.org/sramesh2k/ToolsQuit.htm>

To start Task Manager:

Ctrl + Alt + Delete
or
Ctrl + Shift + Esc
or
Right click the Taskbar | Task Manager
or
Start | Run | Type: taskmgr | Click OK

Ctrl + Alt + Delete opens the Windows Security window if the Welcome
screen
is turned off.

Hi

When I press CTR ALT DEL I get nothing come up no
processes or anything.

Do I have a bug?

Thanks
