Hi,

The net.exe programs stops some programs installing.  
I have to kill the net.exe process in task manager before it allows the  
program to install.

I scanned for viruses and spyware. Its clean.  
The PC is a new fresh clean installation.  
Windows Xp Professional SP2

Thanks for any help.

I suggest you report exactly what you are doing, how you  
are doing it and how you can tell that net.exe prevents some  
programs from installing. Your post is a little to vague to  
draw valid conclusions.
