Hi,

Click start/run, type:

%windows%\windowsupdate.log

then click ok to open the log in notepad. Scroll to the bottom, then look for error codes (formatted as 0x00000000) related to the most recent attempt. Post back here with this information, or better yet to:

[news://msnews.microsoft.com/microsoft.public.windowsupdate](http://msnews.microsoft.com/microsoft.public.windowsupdate)

I am using Automatic Updates on my computer. I select the icon and lists updates to install. I select either Express Install or Custom Install and the process starts. The dialog box says it is installing then a message comes up, Install Failed. There is no error code or anything else. I have been using this for a while and never had this issue before.
