Same answer as in microsoft.public.windowsxp.security_admin and however many other places you might have posted this!!!!!!!!!!!!

What is the accepted way to share a message across multiple newsgroups?

<http://smjg.port5.com/faqs/usenet/xpost.html>

CON is short for CONsole and consists of the keyboard (input) and the display (output).

Reserved Names (reserved device names)

[[Do not use the following reserved device names for the name of a file: CON, PRN, AUX, NUL, COM1, COM2, COM3, COM4, COM5, COM6, COM7, COM8, COM9, LPT1, LPT2, LPT3, LPT4, LPT5, LPT6, LPT7, LPT8, and LPT9. Also avoid these names followed by an extension, for example, NUL.tx7.

Windows NT: CLOCK\$ is also a reserved device name.]]

Aditya Sinha <aditya@xxxxxxxxxxxxxxxxxxxxx> hunted and pecked:

Hello All,

Can anyone please help me in creating a folder named "con" on my system.
Upon naming the new folder as "con" it just reverts back to new folder.

Aditya Sinha
