Thank you! And one more thing, how to cancel if we want to change the time or we want to stop the shutdown process? How to hide this dialogue box?

You're welcome.

To abort: %SystemRoot%\System32\Shutdown.exe -a

To hide the dialogue box, you'll need to use a batch file and run it from your task scheduler.

```
@ECHO OFF
%SystemRoot%\System32\Shutdown.exe -s -f -t 00
CLS
EXIT
```

From a command prompt, type: shutdown /? to see a list of command options

Usage: shutdown [-i | -l | -s | -r | -a] [-f] [-m \\computername] [-t xx] [-c "comment"] [-d up:xx:yy]

No args Display this message (same as -?)
-i Display GUI interface, must be the first option
-l Log off (cannot be used with -m option)
-s Shutdown the computer
-r Shutdown and restart the computer
-a Abort a system shutdown
-m \\computername Remote computer to shutdown/restart/abort
-t xx Set timeout for shutdown to xx seconds
-c "comment" Shutdown comment (maximum of 127 characters)
-f Forces running applications to close without warning
-d [u][p]:xx:yy The reason code for the shutdown

Re: Auto shutdown

u is the user code
p is a planned shutdown code
xx is the major reason code (positive integer less than 256)
yy is the minor reason code (positive integer less than 65536)

Hello,

How to make Windows XP shutdown at specific time? For
example we play
music
at night, we want it turn off by itseft in 1 hour more!

Thanks

Rithy

Click Start, Run. In the Run box, copy & paste the following and click OK.

```
%SystemRoot%\System32\Shutdown.exe -s -f -t 3600
```

3600 is the number of seconds in an hour. Adjust according to your
needs...
