Dr. Indera,

1. actskn43.ocx or one of its components is not correct or registered

actskn43.ocx doesn't seem to be malicious and is also not a Microsoft file.

What program is complaining?

2. crashrpt.dll is missing, corrupt or is the wrong version

"The CrashRpt.DLL works like the new Dr. Watson utility that ships with XP."

CrashRpt.DLL does not seem to be a Microsoft file either.

Sounds like something I'd get rid of. Why you'd need another program trying to fight Dr. Watson is beyond me. ;-)

What program is complaining?

import.dll

import.dll is not a Microsoft file either.

What program is complaining?

Re: Error on start up more

Dr. Indera <dr.indera.bugoff@xxxxxxxxxxxx> hunted and pecked:

hi wes,

oops, i forgot to say that in my other posts. i did uninstall spycatcher and went into the registry and deleted the folders that i saw for it. i also deleted the entries in the startup folder.

i have the software that you listed installed, except for hijack this, but i will install it.

is there a software package that will point out entries in the registry that are from software that has been uninstalled?

i will read the links about spycatcher. thank you. i get the feeling that they don't contain anything positive about the software. if so, that's scary because i read about spycatcher in the computer shopper magazine and they said they picked it and removed spybot for their list of 50 downloads.

when i resolve this, i will post back.

thank you.

Dr. Indera,

Before you consider a Repair Install, you might want to consider uninstalling SpyCatcher Express. I never even heard of it until your post.

You might want to read these from CastleCops...

SPYWARE IN SpyCatcher Express 2006 4.0.4 ? (Score: 1)

http://castlecops.com/a6380-SPYWARE_IN_SpyCatcher_Express_2006_4_0_4.html

<http://castlecops.com/modules.php?name=News&file=comments&op=showreply&tid=1771&sid=6380&pid=1770&...>

Re: Error on start up more

I would strongly recommend getting rid of SpyCatcher Express!

I would recommend any and all of the following free programs.

Download, install, run, update and run again. They are all good, FREE utilities. Make sure you update every program, even if you just downloaded it. You must have the latest updates. Without updates, you have a gun without ammo. You also need to use more than one anti-scamware program. One program will *not* catch everything.

1) SpywareBlaster

[[SpywareBlaster doesn't scan and clean for spyware – it prevents it from ever being installed.

The most important step you can take is to secure your system. And SpywareBlaster is the most powerful protection program available.]]

<http://www.javacoolsoftware.com/spywareblaster.html>

2) Spybot S & D (More for the advanced user)

<http://www.safer-networking.org/index.php?lang=en&page=download>

3) HijackThis (More for the advanced user)

<http://www.spywareinfo.com/~merijn/downloads.html>

3a) HijackThis (direct download)

<http://aumha.org/downloads/hijackthis.zip>

4) Bazooka Adware and Spyware Scanner v1.13

<http://www.kephyr.com/spywarescanner/index.html?source=appvisit>

5) Ad-aware SE Personal

Dr. Indera <dr.inderabugoff@xxxxxxxxxxxx> hunted and pecked:

hi joe,

i just remembered that i created an image less than 24 hours before i installed that spyware software. should i just restore the winnt folder from the image? the reason i ask is because i created and modified a lot of files since the image was created

Re: Error on start up more

and have created/sent emails, which i don't want to over
write.
please advise.
thank you.
