Carey Frisch [MVP] wrote:

HP and Compaq PCs are very good and reliable.

Carey, if that's your honest opinion, I'd have to doubt that you've ever had to support any significant number of either.

Hardware issues have NEVER been one of Carey's strong suits.

Actually, I'm hard pressed to find ANYthing he posts about here to be one of his strong suits.

He's a copy-and-paste artist who rarely has taken the time to investigate issues that he's posting replies to as an "MVP" (he's a JOKE).
