yeah, thats what i meant, anti-malware program

I have been using Webroot Spy Sweeper & Zonealarm Pro.

Do these do a similar/same job?

Were can i find a good and reliable "free" malware program?

I recommend \*against\* malware programs, and recommend using anti-malware software instead. ;-)

No single product is good enough and I recommend a combination of

Spybot Search and Destroy  
Spyware Blaster  
Adaware

All of these are free.
