Hi, need MS? / DELL? default XP OS disk ADMIN Password..

Looking at more down time, than up (7 days), I am back up now, if can get what the password might be, REALLY NEED IT.

Details: re-installing system, downloading XP home SP2, kept crashing: missing / corrupt file: WINDOWS\system32\pci.sys

to see if more minor?: "R"estore would have helped.

ELSE: would I make a procedure for installing ADMIN account, before downloading SP2, with my own LOGON / PASSWORD

(Seems to me that was true to work, initially: my logon / password worked 1st time).

OR !!???) Do I need that password to set up a ADMIN ACCOUNT, to start with:))))

thanks.

Go to <http://home.eunet.no/~pnordahl/ntpasswd/> and download the boot disk, this will enable you to reset any system password on an NT class operating system.
