Thanks for the response with the very clear instructions. Worked perfectly!

Regards and thanks again.

Is there somewhere in Windows files or in the Registry
where one can find
when the operating system was installed on a computer?

Windows XP Home/Professional, the latter for both 32bit
and 64bit editions
are in mind.

Regards and thanks.

JP

Open XP's "Help and Support" and click on "Use Tools to view your
computer
information and
diagnose problems", Click on "My Computer Information", Click on "View
the status of my system
hardware and software", and look under "System Software - Date Created"

Re: OS Install Date

From a command prompt: (Start -> Run -> command -> OK) type:

```
SystemInfo >C:\Info.txt
```

Then double-click "Info.txt" to read it with Notepad.
