Set Update to Download and notify you, you can then install at your leisure/convenience

"C Kreskay" <ckreskay_CURSEING@xxxxxxxxxxxx> wrote in message news:ujYdvHopGHA.1548@xxxxxxxxxxxxxxxxxxxxxxxxxxxx

I use my system to work on projects that can take days with a lot of input required as I work.

so why does the damn thing ask me to reboot twice a day with each new

update

installed?

I have a mind to turn off the updater if it is going to be so

inconvenient.
