Where to download microsoft folder encryptor? Is it in beta stage? Or it just canceled as unstable tool?

thanks.

Is this what you're looking for?

Personally, I think a program such as this and encryption in general are way beyond the needs of home users. These newsgroups are littered with posts asking how to gain access to encrypted files. As soon as the average user starts messing

Re: Folder encryptor

around with encryption they might as well kiss their files
good-bye.

You're on your own.

Nepatsfan

Yes, I meant this program. Many users and specialists criticized this utility and noticed that it have a hang up issue, which could result in lost data if the user doesn't have a backup. There is better encryption programs, however (third party) .
