My C:/ Drive having capacity of 68 GB, data available is of 18 GB, I need to part C: Drive in other 20+20 GB new Drive without disturbing present setting or data.

Pl. guide.

Thanking you.

Regards,

Hardik Shah

As Pegasus said, you need a third party tool. Like Symantec Partition Magic ([http://www.symantec.com/home\\_homeoffice/products/overview.jsp?pcid=sp&pvid=pm80](http://www.symantec.com/home_homeoffice/products/overview.jsp?pcid=sp&pvid=pm80)). Or you can try one of this free tools: <http://www.thefreecountry.com/utilities/partitioneditors.shtml>  
My favorite is Ultimate Boot CD.

Hi,

I have 80 GB Hard disk. It is HP laptop having license version of Window Xp Professional.

Harddisk has two partition C:/ with all and D:/ for recovery system as supplied by HP.

Now, i need one more partition for my personal documents. How can i do this?

Pl. guide me.

Regards,

Hardik Shah
