Yes, this is a known problem with NSW.

"Restoration Incomplete..." when running System Restore with Norton 2006 applications installed:

http://bertk.mvps.org/html/symantec_doc_1.html

The best advise is to dump NSW.

You will find good alternatives on the following page.

Virus and Spyware removal and prevention steps:

Since installing Norton System Works 2006, System Restore is unable to locate previous restore points. Any clues on how to address this? Thanks
